Gen Alpha's digital life

A

Gen Alpha are children born from 2010 onwards.

They are changing the way we live and communicate.

B

They are called digital natives because they learn to use technology before they can read.

They spend a lot of time online, exploring the latest trends.

For them, smartphones, tablets, social media, and even artificial intelligence is normal.

They like creating short videos to show their hobbies and opinions.

C

They use social media to learn about the world and to connect with others.

They like to share memes and send emojis instead of words because they like showing emotions in a creative, fun way.

Many parents are trying to limit their screen time .

Gen Alpha rarely spends a day without using technology, but they are learning to balance online activities with real-life connections.

They are creative, quick learners, and very adaptive. They can use technology to improve education, communication and solve global problems.

The similarities between Gen Z and Gen Alpha

A

- Gen Z and Gen Alpha are two young generations in the world today.

- Gen Z includes people born between 1997 and 2012.

- Gen Alpha includes children born from 2010 till now.

B

- Although they are different, they have some important things in common.

- They are growing up in a digital world.

- Both generations use smartphones, tablets, and computers every day.

C

- They like watching videos on YouTube, using apps and playing online games.

- Social media and online games help them connect, learn, and have fun with others.

- They follow digital trends like short videos, emojis, and memes.

- They speak the same digital language.

- They care about the environment, being kind , and treating people with fairness.

- They often use technology to share their thoughts and support important cases.

مستر انجليزي

A

Gen Alpha are the children born from 2010 onwards.

B

They are called digital natives.

They grow up with phones and tablets.

C

They have too much screen time.

They use smartphones to do homework, research, chat and sometimes to watch memes and short videos.

They follow online trends or post using emojis.

They try to find a balance between real life and screen time.

They should limit their screen time before bed and try to spend more time outside with friends or do sports.

Tips for staying safe online

مستر انجليزى

A

- Everything you do online leaves a digital footprint.

B

- This includes the websites you visit and the things you post.

- You have to be careful about what you post because it can be hard to remove later.

- To keep your information safe, you should use strong passwords.

C

- A strong password has letters , numbers, and symbols. Don't use easy passwords like your name.

- Don't share your password with anyone.

- You can check your apps settings to make sure your privacy is protected.

- Think before you post. You shouldn't share personal data like your address or phone number.

Why your digital footprint is important

مستر انجليزي

A

Everything you do online leaves a digital footprint.

B

When you use social media - like posting pictures, writing comments, or liking videos - you leave behind clues.

These clues make up your digital footprint.

There are two types:

- Active footprint - these happen when you choose to share something online.
- Passive footprint - these happen without your knowing, like when websites connect information about what you look for.

C

People you know might look at your posts and get an idea about you.

That's why it's important to think before you post.

Social media is fun, but it's also forever.

Be smart, be kind, and be careful with what you post.

Facing challenges

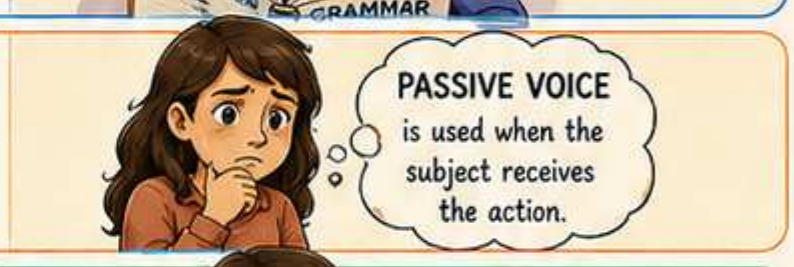
A

Mona always enjoyed English, but this year she faced a new challenge.

B

Grammar lessons became very difficult.

She especially struggled with the passive voice.



She felt discouraged after failing a quiz.

Instead of giving up, she showed determination.

C

Her teacher encouraged her to take it step by step.

With determination, she worked harder. She watched videos, practiced with a friend, and made grammar posters for her room.

Each grammar rule felt like an obstacle, but she didn't stop.

Mona began to improve. She passed her next quiz and felt proud of herself.

Traffic problems in your city and how to solve them

A

B

C

Cairo is a very busy city. Every day , there is a big traffic jam on streets and highways.

Many people drive cars, and roads get blocked.

This causes pollution, making the air dirty.

It makes people feel stressed and tired from waiting.

Egypt is working to solve this problem. New metro lines were built.

Bridges like Tahya Misr Bridge and 6th of October Bridge help cars move faster.

Egypt is building an electric train and a monorail to give people more ways to travel.

Egypt made flyovers and tunnels.

These plans make the roads better.

Now, people use public transportation more and traffic is better.

The power of facing challenges

A

I gave a short speech to my class about facing problems. It was a big challenge, but I did it.

B

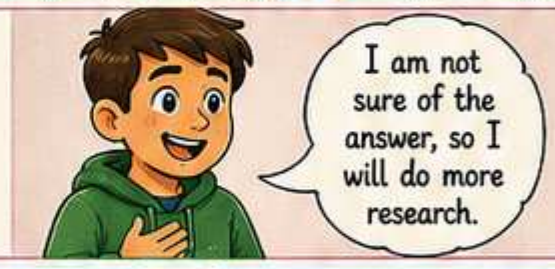
At first, I was a bit nervous. I felt discouraged because I made a mistake while I was speaking.

I told myself to stay calm.
I was sure I could do it.

C

Another challenge was when I was asked a question I was not sure of.

Honestly, I said that I am not sure of the answer, so I will do more research.



It takes a lot of courage to say that.

Sometimes, an obstacle can surprise you, but with honesty and determination, you can go through it.

Challenges help us grow.

Your favorite type of art

A

My favorite type of art is painting because it allows artists to use their imagination and creativity to express ideas and emotions.

B

Bright and colorful paintings always catch my attention and make me feel happy and inspired.

Paintings can carry deep messages, like hidden stories or strong feelings.

I enjoy looking closely at the details to understand what the artist wants to say.

C

For me, painting is not only beautiful but also a way to learn and grow.

It helps us think in new ways and see the world differently.

That is why painting is the type of art I love most.

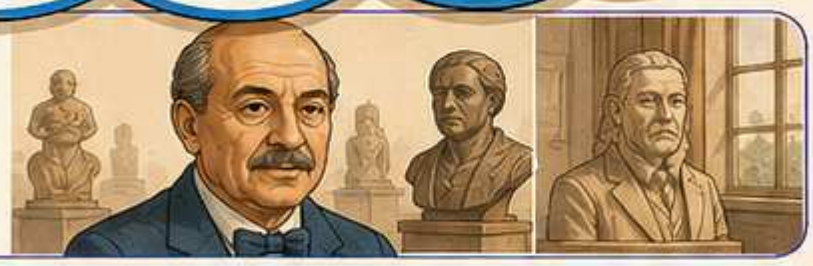
The importance of Mahmoud Mokhtar's art

A

B

C

★ Mahmoud Mokhtar was a very important national artist.



★ He was one of the most famous Egyptian sculptors.

★ He mixed old Egyptian and European styles.

★ He learned to sculpt as a child then he went art schools in Egypt and Paris.

★ His most famous work is Nahdat Misr Statue. This sculpture shows a woman and a sphinx. It's a symbol of Egypt's history and agriculture and was put in a public square in Cairo.

★ Mokhtar participated in the art movement. He used his art to promote Egyptian identity.

★ He gained public recognition.

★ Mokhtar's art played a big role in modern Egyptian art history.

A country you would like to visit and why

I'm a travel blogger. I traveled across many amazing countries, but I would like to visit Japan so much because it's a country full of rich culture and wonderful experiences.

Tokyo is the capital city of Japan. It's one of the most organized places in the world.

The population is large, and the people is polite and respectful.

The tea ceremony is a beautiful tradition that shows calmness and kindness.

Mount Fuji is a quiet, powerful, and impressive landmark in Japan.

Visiting Japan is a chance to be open to new amazing traditions.

An amazing place you have visited

I have visited Petra, Jordan, one of the most amazing destinations in the world.

It's an ancient city carved into red rocks and is over 2,000 years old.

It was once a rich trading city and is one of the new seven wonders of the world.

The most famous building is the Treasury.

Walking through Petra filled my heart with wonder and gave me unforgettable memories.

The beautiful rocks were amazing. It was a special place.

I enjoyed every moment of my great adventure there.

Making your ideas happen

A

1 Many inventions start with a simple thought.

2 Turning that thought into something real and useful takes some work and a few easy steps.

3 First, you need to find a problem . Inventors think of a problem and try to solve it.

B

4 Next, you need to make a plan. You might draw pictures, list the things you need, and decide how your invention will work.

5 Then, you build a model of your idea using simple stuff.

C

6 After that, you have to test your model. You can ask yourself, does it do what I want it to do? Is it safe ? Can I make it better ?

7 If it doesn't work , you can change it and test it again.

8 Finally, when your invention works well, you might show it to other people, build a real version or try to sell it.

9 With imagination and patience, anyone can turn a simple idea into something that makes a difference.

A person you consider a role model

I consider Hany Azer as a role model.

He is a famous Egyptian engineer who made a great impact in the world of civil engineering.

He was born in Tanta and moved to Germany.

He worked as the chief engineer for the Berlin Main Station, one of the largest train stations in Europe.

He has a relative who works as a biomedical engineer.

They believe that using science and technology can help people live better lives.

Biomedical engineers use special tools like sensors to help patients.

Hany Azer is famous for his support and help to young inventors.

He is a role model for many students in Egypt and around the world.

An Egyptian person you admire

A

Ahmed Idris is an Egyptian person I admire.

B

He was a brave Nubian soldier in the Egyptian army and served in the Border Guard during the 1970s.

Before the October War in 1973, he suggested using the Nubian language as a secret code for the army.

C

His idea was very smart because the Nubian language was not written and was only known by Nubian People.

The enemy couldn't understand it.

Thanks to his idea , the Egyptian army sent messages safely and secretly.

In 2017, President El-Sisi honored him for his great role in the victory.

A famous innovator with an impact

Ahmed Zewail was an important Egyptian scientist in modern history.

He was born in Damanhur and grew up in Alexandria.

From a young age, he loved learning and showed great interest in science.

He studied at Alexandria University.

He became a professor of chemistry at the California Institute of Technology.

He discovered the femtosecond.

With this discovery, he was able to study chemical reactions in an extremely short time.

This invention changed the world of chemistry and opened the door for new scientific research.

He won the Nobel Prize in chemistry in 1999.

He was the first Arab scientist to receive the Nobel Prize in this field and this made all Egyptians proud.

He was a role model. He believed in the power of education and advised young people to work hard.

He inspired young scientists and inventors .
